List any known problems/issues with the assignment you are turning in. For example, if you know your code does not run correctly, state that. This should be a short explanation.

My code runs, but doesn't pass all the planr tests.

Provide a short description for the solution or pseudocode for the assignment questions.

Made a class for Collection, implementing the methods described in the prompt. Checked using sample_main.cpp

Provide screenshots of two test cases (from Computer Science Linux machine) and show how you compiled the program (Ex: Command Line and IDE).
